

# **IDEC FT1A SmartAXIS**

Value. Versatility. The New Breed of Controllers.

# **Design-in More Function with Affordable FT1A PLCs**

# Value. Versatility. The New Breed of Controller!

The ideal solution for a variety of applications.

Presenting FT1A, the newest family of SmartAXIS controllers from the industry's original manufacturer of micro PLCs. FT1A controllers deliver affordability without compromise. Features and functions are already built in, so engineers can now enjoy more versatility and more choices for their automation needs than ever before.

Designed to give you the most bang for your buck, these simple, powerful controllers deliver an exceptional value. FT1A controllers are available with 12, 24, 40, or 48 I/O, while a 3.8-inch HMI+PLC with sophisticated features and a super-bright LCD screen is also available.

All FT1A controllers meet the highest industry standards for quality and safety. The FT1A SmartAXIS family is CE compliant, cULus listed, has ABS (Certificate of Design Assessment) and is Class I Division 2 rated for hazardous locations. Whatever your application requires, the FT1A SmartAXIS family has a solution!

# FT1A Touch HMI + PLC

# A Breed of Its Own

The perfect combination of PLC processing and HMI monitoring and control, the 3.8-inch SmartAXIS Touch is an all-in-one touchscreen interface and logic controller. With a compact body and full complement of features, FT1A is perfect for small systems that require a graphical user interface along with versatile I/O controls at a truly affordable price.

# Analog Expansion Cartridges (Transistor ....... Output Models)

- Up to 2 analog expansion adapters can be configured on the FT1A Touch.
- Maximum combination of 2in/6out, 4in/4out, or 6in/2out analog I/O can be configured.

# RS232C and RS485 ports

- Built-in RS232C, RS422/485 interface for serial communication.
- Communication with IDEC or other PLCs also supported through this serial port.

#### USB-A Port .....

Embedded USB-A port for data logging and recipe data, as well as for performing program updates.

#### Relay or Transitor Outputs .....

- Relay output type equipped with 10A contact, so no interposing relays required.
- Transitor output type equipped with 300mA per channel.

# Analog Outputs (Transistor Output ..... Models)

2 built-in 0-10VDC, 4-20mA analog outputs.

#### Digital, Analog and High-speed Inputs .....

8 built-in DC inputs

- 2 inputs (I6 and I7) can be configured as 0-10V DC analog inputs or 4-20mA analog inputs (transistor output models)
  - 10-bit resolution
- 4 high-speed counters
  - Up to 10kHz

#### Harsh Environments

- Class I, Division 2 for hazardous locations
- -20 to 55°C operating temperature (color models)

#### **RJ45 Ethernet Port**

- Supports remote Ethernet communication and Modbus TCP.
- Communication with IDEC or other PLCs also supported through the Ethernet port.

# FT1A Touch Features

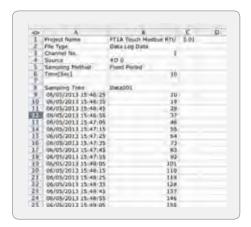

#### **Control Functions**

### **Fast Processing Speed**

Basic instructions can be processed in 1850µs per 1000 steps of programming.

### **Data Logging**

Critical data can be saved and logged into a USB memory stick then retrieved over an Ethernet connection or by removing the USB memory stick from the FT1A Touch and inserting it into a laptop or PC.

# Easy Program File Transfer

Project files can be transferred between a USB memory stick and the FT1A Touch. It is a quick and convenient way for an OEM to program multiple units and for users to quickly update ladder and HMI programs.

## **Digital and Analog Inputs**

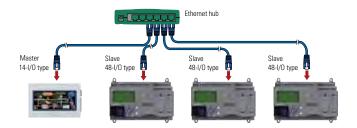

The FT1A Touch is equipped with 8 digital inputs, two of which can be configured as 0-10V DC or 4-20mA analog inputs with 10-bit resolution, reducing overall system cost.

# **High-speed Counters**

With 8 built-in inputs, 4 can be configured as high-speed counters, with a maximum frequency (range) of 10kHz for single-phase or 5kHz for dual-phase.

#### Remote I/O

Up to three FT1A controllers (24, 40 and 48 I/O) can be configured as remote I/O slaves for the FT1A Touch, expanding your system's potential. A maximum of 158 I/O can be achieved.

### **Analog Expansion Cartridges**

Using analog expansion cartridges, FT1A Touch can utilize 0-10V DC, 4-20mA, RTD and Thermocouple inputs.

#### **PID Controls**

With an improved PID algorithm and easier-to-configure dialog box, PID controls can be monitored using a single screen. Advanced PID control functions, such as auto-tuning, ARW (anti-reset windup) and bumpless transfer, are also supported.

### **Large Programming Memory**

With 47.4KB of logic controls programming, complex PLC programs can be constructed without much restriction. And with 5MB of configuration memory for the display, a unique and professional display interface can be easily configured.

### 10A Relay Outputs

With 10A contact ratings on all four of the relay outputs, the FT1A Touch can be directly connected to a solenoid valve or motor, which eliminates interposing relays and reduces wiring.

# 65,536 TFT Color LCD

With so many color combinations, an intuitive and crisp graphical user interface can be constructed with unparalleled visibility.

### Super-Bright LED

The 65K TFT color unit is rated at 400cd/m2, while the monochrome unit is rated at 740cd/m2. With 32 levels of brightness control, the backlight can even be adjusted according to the surrounding conditions.

### **Drivers for IDEC and other PLCs**

FT1A Touch can easily be configured to communicate with IDEC or other PLCs such as Siemens, Automation Direct, Mitsubishi, Omron, and more.

# **Display Functions**

# **Ethernet Connectivity**

With the embedded RJ45 Ethernet port, FT1A project files can be remotely uploaded or downloaded over an Ethernet connection. Critical logging data can also be retrieved quickly.

## Modbus TCP or RTU

The built-in Ethernet ports allow the FT1A Touch to be configured as a Client (Master) or Server (Slave) on the Modbus network. Modbus RTU (Master) is also supported. With these capabilities, FT1A Touch can communicate with other PLCs or devices using Modbus protocol.

# Ladder Program and I/O status

Ladder programs can easily be monitored and controlled on the 3.8" (3.7"monochrome) display. It is a unique tool to debug the system without using WindLDR software and a PC. I/O status and any control parameter such as data register, timer, and internal relay can also be monitored and controlled.

# Fast Start-up

Once power is applied to the FT1A Touch, it takes only 3 seconds for it to be fully functional. The fast start-up allows for fast, easy debugging and stress-free operation.

# The Value of Our Controllers is in the Details

# **FT1A Controllers**

FT1A controllers are designed for a range of applications that demand powerful and abundant features. Available with 12, 24, 40 and 48 I/O with and without embedded LCD/keypad, these controllers enable engineers to design cost-effective solutions.

# Smart LCD Screen

The display (24 digits x 4 lines) can provide visual feedback of system status, I/O status, user configurable messages with dynamic data, bar graph, and ladder program monitor and controls.

#### Non-LCD Model

FT1A controllers are also available without embedded LCD/keypad. It's a cost-effective, tamper-proof solution.

#### USB mini-B

With the USB mini-B port, communication with FT1A controllers is extremely convenient as standard USB Type A to mini-B cables can be used.

Note: Features available on specific models. See page 14 for selection guide.

# Universal Voltages

24V DC or 100-240V AC

### **Memory Cartridge**

The optional memory cartridge can be used to easily transfer programs from the internal ROM memory of FT1A controllers to a memory cartridge or vice versa. It's a convenient method to update the PLC program in the field.

#### Digital, Analog and High-speed Inputs

Inputs on the 24V DC power models can be configured as digital, 0-10V DC analog or high-speed counters. Up to 8 analog inputs with 10-bit resolution and up to 6 HSC 100kHz can be configured.

#### **RJ45 Ethernet Port**

The embedded Ethernet port on the FT1A controllers provides users with easy access for remote maintenance and communication. It also supports industry standard Modbus TCP protocol. With Ethernet Remote I/O capability, the FT1A controller's I/O can be easily expanded.

#### Real-Time Clock

Every FT1A controller is equipped with an embedded real-time clock for time-controlled applications. With the built-in, real-time clock, log data can also be tracked and, with just a click, daylight savings time can easily be setup.

#### RS232C and RS485 Ports

Up to two RS232C and/or RS485 communication cartridges can be plugged into the FT1A controllers to allow the PLC to communicate with other serial devices. It also supports industry standard Modbus RTU protocol.

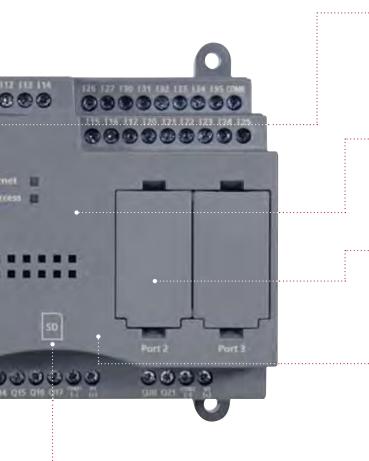

#### **Large Programming Memory**

With up to 47.4KB (11,850 steps) of programming memory, FT1A controllers have enough memory for even complex PLC programming.

#### **SD Memory Card**

With the embedded SD memory slot, critical data can be easily logged and retrieved over Ethernet connections or simply remove the SD card and plug it into your PC.

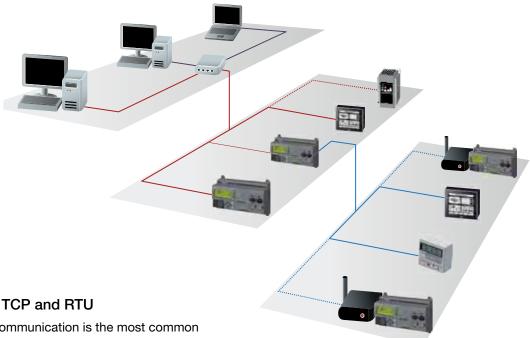

#### 10A Relay and High-speed Outputs

The FT1A controller with relay outputs is equipped with four 10A relay contacts. The transistor outputs model is also equipped with two 100kHz high-speed outputs for simple positioning controls. With remote I/O capability, additional outputs can easily be added.

# A Closer Look at Our Feature-rich Controllers

# From Connecting to Remote Access

From connectivity to remote access to visual display, FT1A leads the way with versatile, full-featured controllers. No other controllers offer such a broad range of capabilities at such a competitive price.

### Modbus TCP and RTU

Modbus communication is the most common protocol in the automation industry. The entire FT1A family (except the 12 I/O CPU) supports Modbus TCP and Modbus RTU, making communication with other devices a breeze.

### **Ethernet Connectivity**

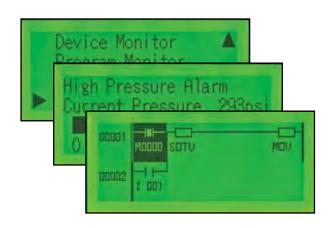

Thanks to the embedded RJ45 Ethernet port (on all models except 12 I/O), FT1A controllers can be easily accessed from remote locations. Using WindLDR software, PLC programs can be updated remotely and critical parameters monitored and controlled. Remote connectivity is a critical part of today's control environment, and FT1A controllers meet every challenge with fast, easy, and reliable Ethernet connectivity.

### **SD Memory Card**

FT1A 40 and 48 I/O controllers are equipped with an SD memory slot for data logging. Memory cards up to 32GB are supported. Log data is time/date stamped and stored in .CSV format, making it simple to review and analyze critical system data.

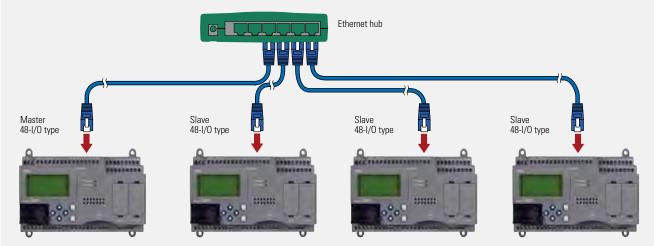

# **Smart LCD Display**

With the embedded LCD screen, I/O status, system menus, customized dynamic messages, and bar-graph readouts can all be configured and displayed. Ladder programs can be displayed and controlled as well. You can configure up to 50 customized messages, all with dynamic values (24 digits by 4 lines max.). The backlight can be turned on or off. Scrolling and flashing are also supported.

#### Remote I/O

The FT1A remote I/O, available in all Ethernet-capable modules, enables you to expand the number of inputs and outputs by simply connecting separate FT1A modules via Ethernet as remote I/O slaves. The FT1A remote I/O can monitor and control a total of 192 points of I/O.

48-1/0 type (master) + 48-1/0 type (slave) + 48-1/0 type (slave) + 48-1/0 type (slave) = 192 1/0 (30 inputs, 18 outputs) + (30 inputs, 18 outputs) = 120 inputs, 72 outputs

### **Built-in Analog Inputs**

The FT1A controllers support up to 8 built-in, 0-10V DC analog inputs with 10-bit resolution, depending on the model. Having the option to configure the analog inputs on the CPU saves you time, space and money.

### 100kHz, High-Speed Counters and Outputs

Models with transistor outputs feature two 100kHz high-speed outputs for positioning control and all FT1A controllers are equipped with up to six 100kHz high-speed counters.

# 10 Amp Relay Contacts

FT1A controllers with relay outputs offer 10 Amp rated contacts. Traditional PLC relays are only rated for 2 Amps. Therefore, FT1A controllers reduce the need for, and spare you the cost of, using interposing relays.

# **Built-in Real Time Clock**

Equipped with a real-time clock for use with any time-controlled applications, FT1A controllers have built-in support for US, Canadian, European, and Australian daylight savings time. The option for the user to configure their own custom daylight savings schedule is also available, providing the utmost in flexibility.

# **USB Maintenance Port**

A convenient USB mini-B maintenance port is standard on all FT1A controllers, which means any standard Type A to mini-B USB cable can be used. No special cable is necessary.

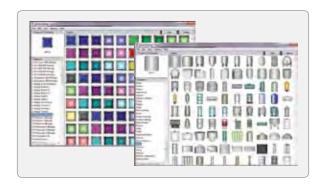

# Our Automation Organizer Software is Simple and Intuitive

# A Complete Automation Suite: All-in-one Configuration Software

Automation Organizer (A0) is a powerful software suite containing WindLDR PLC programming software, WindO/I-NV2 HMI configuration software, WindO/I-NV3 FT1A Touch configuration software, and WindCFG system configuration software. A0 is an all-in-one automation software package for IDEC PLCs and IDEC HMIs. The news gets even better, because A0 software upgrades are always FREE.

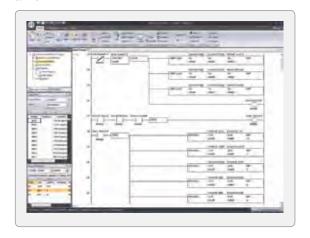

#### WindO/I-NV3

WindO/I-NV3 is our exclusive configuration software for the FT1A Touch. Using the same platform as WindO/I-NV2 HG HMI programming software, WindO/I-NV3 provides users with the same intuitive experience. Users can easily display alarm screens, trend and bar graphs, scrolling texts and meters. With thousands of industry-standard bitmap libraries, creating a professional interface is just a click away.

#### WindLDR

All IDEC PLCs—including the FT1A family—are programmed with WindLDR software. This icondriven programming tool combines logic and intuition with an incredibly easy-to-use interface. Offline simulation, I/O Force and program bookmarks are just some of the standard features you'll find in WindLDR. Newly added for FT1A are Function Block Diagram (FBD) and Script programming. Over the years, WindLDR has proven to be the most user-friendly, intuitive software available for beginners and advanced programmers alike.

### **Simulation Mode**

WindLDR allows you to simulate ladder and Function Block Diagram (FBD) programs in FT1A. You can easily test and verify functionality of your ladder and FBD programs without having to connect any hardware.

### **Comment Download Settings**

The comment download settings allow you to choose whether to download Tag names, rung comments, custom monitor dialog boxes or file names. The biggest advantage of utilizing these settings is that once a program is retrieved from the PLC, all these important parameters will be available.

# **Function Block and Scripting**

In addition to ladder logic, WindLDR now supports Function Block Diagram (FBD) and Script programming. With the FT1A controllers, you now have the flexibility and convenience of programming using any or all of these methods.

# Free 30-Day Demo

Curious to see how an IDEC FT1A SmartAXIS controller might complement your design? Find out for yourself!

Just go to **www.IDEC.com/download** and download your free 30-day demo.

# Powerful controller with embedded I/O. Touch, Pro, and Lite models for flexible use in almost all applications.

- Drag & drop action of function block diagram (FBD) makes programming easy (except PID control).
- Addition of scripts to WindLDR makes it easy to manage multiple processing (55 scripts total).
- Digital/analog-compatible input available for 24V DC.
   Convenient for systems requiring minimal analog inputs.
- 10A output relays connect directly to small motors and solenoid valves.
- Supports communication via RS232C, RS485, and Ethernet.
- USB programming port.
- User's program can be changed with the memory cartridge (Pro/Lite) or USB memory (Touch).
- Certified for marine use (except transistor output type).

#### Touch (Display model)

- By integrating the control function (same functionality as Lite 12-I/O type) with a small display, a connected device is not needed. Wire and space-saving features offer the ideal solution for cost- and time-savings.
- Touch is an advanced small display with integrated control function.
- The transistor output models are suitable for applications where the durability of relay contacts is a concern.
- Connection to analog devices is possible with the transistor output model with two analog inputs (0-10V/4-20mA) and two analog outputs (0-10V/4-20mA), reducing installation space and costs.
- Installing analog cartridges on the transistor output model achieves a maximum of Al/AO: 2/6, 4/4, and 6/2 system configuration (when using two analog expansion cartridges). Adding the temperature input type cartridge enables simple PID control.
- PID control can be programmed easily and intuitively with the enhanced, proprietary dialog in WindLDR. PID monitor function greatly reduces the engineering time necessary for program debugging and system setup.
- Ethernet remote I/O master is available.
- 400cd/m<sup>2</sup> high-contrast and 65,536 color high-resolution TFT LCD provides unparalleled visibility.
- Adjustable LED brightness function.
- Monochrome STN models are equipped with a 740 cd/m<sup>2</sup> brightness LCD and backlit with a choice of 3 colors (pink, red, white), providing practically the same brightness as the color LCD models.
- Program both the Pro and Lite models using WindLDR and the Touch model using WindO/I-NV3. Our intuitive programming software that is easy even for the first-time users.

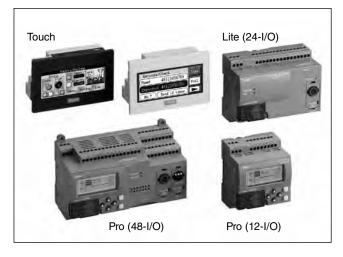

Touch (relay output) (photo: FT1A-\*12RA-B)

NEW

Touch (transistor output) (photo: FT1A-\*14SA-W with analog expansion cartridges)

### Pro (LCD Model) / Lite (No LCD Model)

- Parameters such as counters and timers can be adjusted using the LCD and six operations buttons (also available on Touch).
- Monitor screens on LCD show system status and settings.
   "I/O status monitor" screen for monitoring I/O status
   "Device monitor" screen for monitoring SmartAXIS device
- "Ladder Monitor" screen for monitoring the operating ladder program
- "Status monitor" screen: also useful for confirming protection status and scan time
- The states of four operation buttons can be used as digital inputs in the user programs.
- Supports positioning control with a single-phase (100 kHz)/4 point or a single-phase (100 kHz)/two-phase (50 kHz)/2 point high-speed counter input and 100 kHz/2 point pulse output. The new ARAMP instruction and enables you to program complex positioning systems easily.
- Integrated data logging function using an SD memory card. Logged data is useful for system maintenance management. (Touch: available using USB memory)
- Lite (No LCD) is available, offering more options for product selection.
- A maximum of 144 I/Os can be added using the remote I/O function with Ethernet.
   (Input: 90 I/O max., Output: 54 I/O max.)

# **General Specifications**

# **Touch (Display Model)**

Part No.	FT1A-*12RA-*	FT1A-*14KA-* / FT1A-*14SA-*
Output	Relay output	Transistor output
Rated Power Voltage/ Power Supply Isolation	24V DC/Not isolated	
Allowable Voltage Range	20.4 to 28.8V DC (including ripple)	
Power Consumption	9.2W maximum	11W maximum
Allowable Momentary Power Interruption	10 ms maximum	
Dielectric Strength	1. Between power terminal and FE terminal: 500V AC, 5 mA, 1 minute 2. Between power terminal and output terminal: 2,300V AC, 5 mA, 1 minute	1. Between power terminal and FE terminal: 500V AC, 5 mA, 1 minute 2. Between power terminal and output terminal: 500V AC, 5 mA, 1 minute
EMC Immunity	IEC/EN 61131-2:2007 compliant	
Inrush Current	50A maximum (5ms maximum)	
Operating Temperature	Color display: -20 to +55°C, Monochrome display: 0 to +5	55°C (Note 1) (Note 2)
Storage Temperature	−20 to +60°C (no freezing)	
Relative Humidity	10 to 95% RH (no condensation)	
Pollution Degree	2 (IEC 60664-1)	
Corrosion Immunity	Atmosphere free from corrosive gases	
Degree of Protection	IP66F TYPE 4X TYPE 13 (Panel front) (Note 3), IP20 (Rear	)
Ground	Functional grounding	
Protective grounding conductor	UL1007 AWG16	
Vibration Resistance	5 to 8.4 Hz half amplitude 3.5 mm, 8.4 to 150 Hz, accelerati 2 hours per axis on each of three mutually perpendicular ax	
Shock Resistance	147 m/s <sup>2</sup> , 11 ms, X, Y, Z directions 3 times (IEC 61131-2)	
Mounting Structure	Panel mount	
Weight (approx.)	300g	250g

- Note 1: FT1A-\*12RA-\* hardware version V130 (indicated on hardware) and earlier is UL, c-UL listed at 50°C (maximum operating temperature). Note 2: See SmartAXIS Touch User's Manual FT9Y-B1390(2) for I/O derating. Note 3: Operation not guaranteed when used with certain types of oils.

# Instructions

**Basic Instructions (Touch/Pro/Lite)** 

Dasio ilisti	detions (redefin rozeite)
Instructions	Function
LOD	Stores intermediate results and reads contact status
LODN	Stores intermediate results and reads inverted contact status
AND	Series connection of NO contact
ANDN	Series connection of NC contact
OR	Parallel connection of NO contact
ORN	Parallel connection of NC contact
ANDLOD	Series connection of circuit blocks
ORLOD	Parallel connection of circuit blocks
BPS	Saves the result of bit logical operation temporarily
BRD	Reads the result of bit logical operation which was saved temporarily
BPP	Restores the result of bit logical operation which was saved temporarily
OUT	Outputs the result of bit logical operation
OUTN	Output the inverted result of bit logical operation
SET	Sets output, internal relay, or shift register bit
RST	Resets output, internal relay, or shift register bit
TMS	Subtracting 1-ms on-delay timer (0 to 65.535 sec)
TMH	Subtracting 10-ms on-delay timer (0 to 655.35 sec)
TIM	Subtracting 100-ms on-delay timer (0 to 6553.5 sec)
TML	Subtracting 1-sec on-delay timer (0 to 65535 sec)
TMSO	Subtracting 1-ms off-delay timer (0 to 65.535 sec)
ТМНО	Subtracting 10-ms off-delay timer (0 to 655.35 sec)
TIMO	Subtracting 100-ms off-delay timer (0 to 6553.5 sec)
TMLO	Subtracting 1-sec off-delay timer (0 to 65535 sec)
CNT	Adding counter (0 to 65,535)
CNTD	Double-word adding counter (0 to 4,294,967,295)
CDP	Dual pulse reversible counter (0 to 65,535)
CDPD	Double-word dual pulse reversible counter (0 to 4,294,967,295)
CUD	Up/down selection reversible counter (0 to 65,535)
CUDD	Double-word up/down selection reversible counter (0 to 4,294,967,295)
CC=	Equal to comparison of counter current value
CC≥	Greater than or equal to comparison of counter current value
DC=	Equal to comparison of data register value
DC≥	Greater than or equal to comparison of data register value
SFR	Forward shift register
SFRN	Reverse shift register
SOTU	Rising-edge differentiation output
SOTD	Falling-edge differentiation output
JMP	Jumps a designated program area
JEND	Ends a jump instruction
MCS	Starts a master control
MCR	Ends a master control
END	Ends a program
	·

# **Function Blocks**

32

Туре	Symbol	Name and Diagram	Function
	1	Digital Input	Inputs ON/OFF information from an external to the SmartAXIS.
Input	SM	Special Internal Relay  SM OUT	Special internal relays can be used as bit inputs for FBs in the SmartAXIS. Special function is allocated to each special internal relay.
	R	Shift Register	Outputs ON/OFF state of a shift register device.
	AI	Analog Input  Al Aout	The analog input values (0 to 10V DC) for the analog input terminals are converted to digital values (0 to 1,000) and output. With the analog input linear conversion function, the analog input value can be linearly conversion within a range of –32,768 to 32,767.
Output	Q	Digital Output  Q OUT	Outputs ON/OFF information from the SmartAXIS to an external device.
Οιιραί	М	Internal Relay  M OUT	A bit unit FB used internally by the SmartAXIS.
	AND	Logical AND	Implements logical AND for a maximum of four input signals (ON/OFF) and outputs the result.
	NAND	Negative Logical AND	Implements negative logical AND for a maximum of four input signals (ON/OFF) and outputs the result.
	OR	Logical OR	Implements logical OR for a maximum of four input signals (ON/ OFF) and outputs the result.
	NOR	Negative Logical OR	Implements negative logical OR for a maximum of four input signals (ON/OFF) and outputs the result.
l a sia al	XOR	Exclusive Logical OR	Implements exclusive logical OR for a maximum of two input signals (ON/OFF) and outputs the result.
Logical Operation	NXOR	Negative Exclusive Logical OR Na = 1 - OUT	Implements negative exclusive logical OR for a maximum of two input signals (ON/OFF) and outputs the result.
	NOT	Negation Note: 1 Note:	Outputs the result of negating the input signal (ON/OFF).
	SOTU	Shot up	Turns on the output for one scan when the input signal turns from off to on.
	SOTD	Shot down	Turns on the output for one scan when the input signal turns from on to off.
	TRUTH	Truth Table	A truth table for the output can be configured corresponding to the 16 patterns combination of the four input signals, and TRUTH FB outputs the result according to the table.
	TIMU	On-delay Count Up Timer	After the execution input turns on, the output turns on when the on-delay time elapses. The current value is incremented from zero to the preset value.
	TIMD	On-delay Count Down Timer TIME OUT	After the execution input turns on, the output turns on when the on-delay time elapses. The current value is decremented from the preset value to zero.
	TIMOU	Off-delay Count Up Timer	When the execution input turns on, the output turns on. After the execution input turns off, the output turns off when the off-delay time elapses. The current value is incremented from zero to the preset value.
Timer	TIMOD	Off-delay Count Down Timer	When the execution input turns on, the output turns on. After the execution input turns off, the output turns off when the off-delay time elapses. The current value is decremented from the preset values to zero.
	TIMCU	On/off-delay Timer	After the execution input turns on, the output turns on when the on-delay time elapses. After the execution input turns off, the output turns off when the off-delay time elapses.
	SPULS	Single Shot Pulse	After the execution input turns on, the output turns on for the configured time period.
	DTIM	Dual Timer su on or	The output is turned on and off according to the configured ON and OFF time.

Timer	RPULS	Random Pulse Output	The output is turned on for the length of random time within the configured range of time.
	CNT	Adding Counter	When the clock input is turned on, the current value is incremented by one. The output turns on when the current value reaches the preset value.
Counter	CUD	Up/Down Selection Reversible Counter	When the clock input is turned on, the current value is incremented or decremented by one according to the up/down selection input. The current value is compared with ON/OFF thresholds. The output turns on or off according to the comparison result.
	HOUR	Hour Meter	Accumulates the ON duration of the execution input in hours, minutes, and seconds. The output turns on when the accumulated time reaches the configured time.
Shift Register	SFR	Shift Register	When the execution input turns on, the shift registers are shifted to the specified shift direction.
	СМР	Data Comparison	Two inputs values are compared and the output turns on or off according to the comparison result.
Data Comparison	STTG	Schmitt Trigger	The comparison input value and the ON/OFF thresholds are compared and the output turns on or off according to the comparison result.
	RCMP	Range Comparison	The comparison input value and the upper/lower limits are compared and the output turns on or off according to the comparison result.
Data Conversion	ALT	Alternate Output	Sets/resets the output.
Week	WEEK	Weekly Time    N	Compares the specified day of the week, ON time, and OFF time with the current time and outputs the result.
Programmer	YEAR	Yearly Timer  Very YEAR OUT STATE OF ST	Compares the specified date with the current date and outputs the result.
Interface (Note 1)	MSG	Message EN MSG - OUT	Displays data such as text and device values on the LCD on the SmartAXIS Pro.
	PULS	Pulse Output    Nation   Pulse   Pulse	Outputs pulses at the specified frequency.
	PWM	Pulse Width Modulation  EX PRINT OF THE PRIN	Outputs pulses at the specified frequency and duty cycle.
Pulse (Note 2)	RAMP	Ramp Pulse Output	Outputs pulses with the frequency change function.
	ZRN	Zero Return	Outputs pulses with the different pulse frequency corresponding to the on/off state of a deceleration signal.
	ARAMP	Advanced Ramp	Output pulses with the frequency change function according to the settings configured in the frequency table.
Data	DLOG	Data Log EN DLOG - OUT	Saves the values of the specified devices in the specified data format as a CSV file to the SD memory card.
Logging (Note 3)	TRACE	Data Trace EN-TRACE - CUT	Saves the values of the previous number of scans for the specified device in the specified data format as a CSV file to the SD memory card.
Script	SCRPT	Script EN SCRPT OUT	Enables you to program complicated processing with the script language that supports conditional branching, logical operations, arithmetic operations, and functions.
Special	HSC	High-speed Counter (Note 4)	Operates the high-speed counter configured in the function area settings. Turns on/off the high-speed counter gate input/reset input/clear input.
Special	RSFF	RS Flip-flop	When the set input turns on, the output turns on and keeps on. When the reset input turns on, the output turns off.

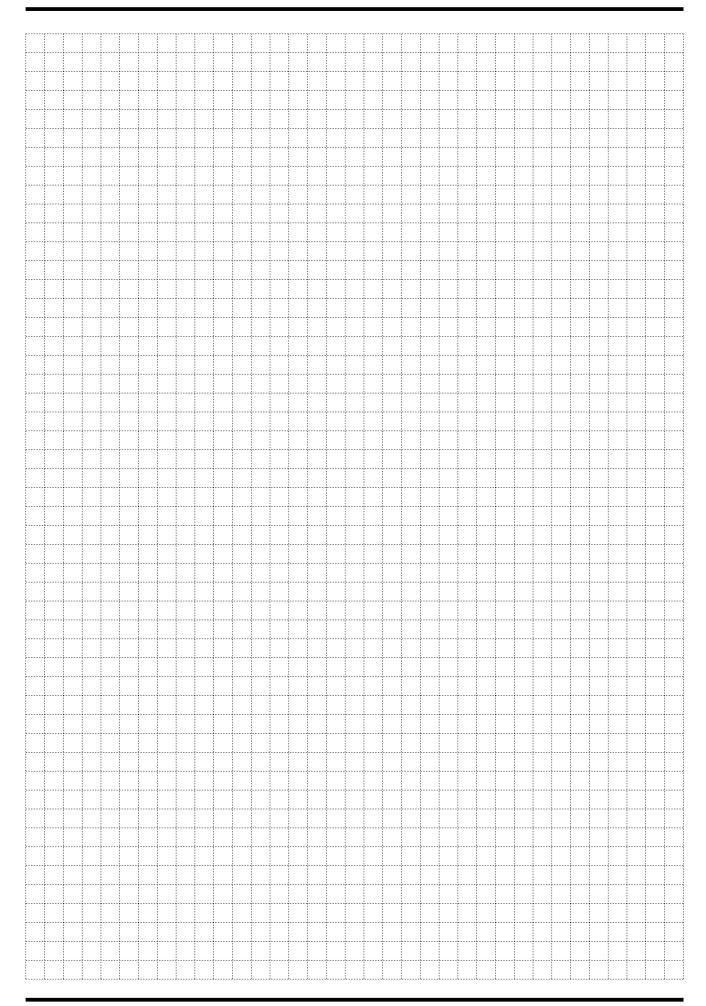

Note 2: Pro/Lite 40-I/O DC type and 48-I/O AC/DC type only Note 4: Touch, Pro/Lite DC power type only

Note 1: Pro only Note 3: Pro/Lite 40-I/O, 48-I/O only

# **Scripts**

	Туре		Format	Description
		if	if (Cond. expr. ) { Exe. line ;}	
Control statements		if else	if (Cond. expr. ) { Exe. line1 );} else{(Exe. line2 );}	Execution line is executed if the conditional expression is extinted
		if else if else	if (Cond. expr1) {	Execution line is executed if the conditional expression is satisfied.
		switch case default	switch (Cond. expr.)  (case constant 1: (Cond. expr1.);break; case constant2: (Cond. expr2.); break; default: (Cond. expr3.);break;	Execution line is executed if the value of conditional expression matches the constant.
		while	while (Cond. expr. ){ Exe. line ;}	Execution line is repeatedly executed while the conditional expression is satisfied.
		break	break;	Once the conditional expression is satisfied, it will go out of the loop by break.
		return	return;	Script is ended.
Relation	al operator	==, !=, <, >, <=, >=	==,!=,<,<=,>,>=	Two values are compared.
_ogical o	operator	&&, II, !	&&,II,!	Logical operation of two values (AND, OR, NOT).
Arithmet	ic operator	+, -, *, /, %, =	+,-,*,/,%	Addition, subtraction, multiplication, division, remainder, assignment
Bit opera	ator	&, I, ^, ~, <<, >>	&,I,^,~,<<,>>	Logical product (AND), logical sum (OR), exclusive logical sum (XOR), reverse, shift left, shift right
		Bit set	SET (a);	Turns bit device (a) to 1
Bit funct	ion	Bit reset	RST (a);	Turns bit device (a) to 0.
		Bit reverse	REV (a);	Reverses the 1 and 0 of bit device (a).
		Maximum value	MAX(a, b, c)	Returns the maximum value out of (a, (b), c).
		Minimum value	MIN (a, b, c)	Returns the minimum value out of (a, b, c).
		Exponential function	EXP (a)	Returns exponential function of (a).
		Natural logarithm	LOGE (a)	Returns natural logarithm (base is e) for (a).
		Common logarithm		Returns common logarithm (base is 10) of (a).
		Exponentiation	LOG10 (a)	Returns (a) to the power of (b).
			POW (a, b)	Returns the square root of (a)
	Arithmetic	Square root	ROOT (a)	
	operation	Sine	SIN (a)	Returns the sine of sine of a (-1 to +1).  Returns the cosine of a (-1 - +1).
		Cosine	COS (a)	
		Tangent	TAN (a)	Returns the tangent of a (-1 to +1).
		Arcsine	ASIN (a)	Returns the arcsine of (a) (-1 to +1) in radian value (- $\pi$ /2 to + $\pi$ /2).
		Arccosine	ACOS (a)	Returns the arccosine of (a) (-1 to +1) n radian value (0 - π).
		Arctangent	ATAN ([a]);	Returns the arctangent of (a) (-1 to +1) in radian value (- $\pi$ /2 - + $\pi$ /2).
Word function		Conversion from angle to radian	RAD (a);	Converts the value of (a) from degree (°) to radian and returns the value.
		Conversion from radian to angle	DEG (a);	Converts the value of (a) from radian to degree (°), and returns the value.
		Conversion from BCD to Binary	BCD2BIN (a)	Returns the BCD value of (a) in binary value.
		Conversion from binary to BCD Conversion	BIN2BCD (a)	Returns the binary value of (a) in BCD value.
	Data type	from float32 to binary	FLOAT2BIN (a)	Returns the float32 value of (a) in binary value.
	conversion	Conversion from binary to float32	BIN2FLOAT (a)	Binary value of is returned in float32 value.  Returns the binary value of (a) in float32 value.
		Conversion from decimal to string character	DEC2ASCII (a, b)	Converts the decimal number of (b) to a character string, and stores in order wit (a) as a starting device.
		Conversion from string character	ASCII2DEC (a)	Returns the character string (a) as decimal number value.
	Data	to decimal  Data comparison	MEMCMP (a, b, c)	Compares the values of of device (a) for (c) and values of device (b) for (c).
	comparison and copy	Data copy	MEMCPY (a, b, c)	Copies the values from (a) for (c) words to (b) for (c) words respectively.
	ана сору	Character string copy	STRCUT (a, b, c, d)	Copies character string.
	Character	Character number count	STRLEN (a)	Returns the number of characters for character string.
	string operation	Character string concatenation	STRCAT (a), b)	Concatenates character string.
	Operation	Character string search		Search character string.
		Drawing of straight line	STRSTr. (a, b)	Draws a straight line connecting the start coordinate and end coordinate.
Draw (Note 1)		Drawing of rectangle	LINE (a, b, c, d)  RECTANGLE (a, b, c, d)	Rectangle with left top corner as start coordinate and bottom right corner as end coordinate is drawn.  Draws a rectangle with left top corner as start coordinate and bottom right corner as end coordinate.
		Drawing of circle and ellipse	CIRCLE (a, b, c, d)	Draws a circle with specified radius from the center coordinate.
Offset		Indirect specification	OFFSET (a, b)	Specifies the device words (b) from (a).
	- 44	Bit device (1 word length) to	BITS2BITS (a, b)	Copy 1 word from bit devices to bit devices.
Bit device ⇔ word device Cross Operator Functions (Note 2)		bit device (1 word length) Bit device (1 word length) to Word device	BITS2WORD (a, b)	Copy 1 word from bit devices to a word devices.
		Word device to bit device (1 word length)	WORD2BITS (a, b)	Copy 1 word from a word device to bit devices.

Note 1: Touch (WindO/I-NV3) only Note 2: Pro/Lite (WindLDR)

# **HG Series Operator Interface**

SmartAXIS Pro/Lite can be connected to IDEC's HG series operator interface for powerful expressivity and rich information!

- · Excellent visibility achieved by super-bright LED backlight. 600 cd/m<sup>2</sup> (8.4-inch), 700 cd/m<sup>2</sup> (10.4-inch), 550 cd/m<sup>2</sup> (12.1-inch), 800 cd/m2 (5.7-inch)
- High-resolution SVGA (800 × 600 pixels) and 65,536 colors provides high-quality display.
- More than 7,000 graphic images available in the image library.
- A maximum of four expansion MicroSmart I/O modules can be mounted.
- · Multimedia models with video and audio record and play back high qual-
- Fast-speed 400 MHz CPU and unique software technology shorten startup time.
- IP66 (front part when mounted) (IEC 60529)

# **Switching Power Supplies**

# PS5R-S

- Slim size DIN rail mount switching power supplies with finger-safe terminals
- Universal input. Wide power range: 10W, 15W, 30W, 60W, 90W, 120W, and 240W.
- · DIN rail mounting. Optional mounting bracket is available for panel surface mount.
- IP20 (IEC 60529)

# PS6R

- · High-power and spacesaving.
- 93% efficiency reduces running costs.
- Input voltage: 100 to 240V AC (voltage range: 85 to 264V AC/110 to 350V DC)
- · The terminals are captive spring-up screws. Ring or fork terminals can be used.

- Finger-safe construction prevents electric shocks.
- · Panel mounting bracket and side-mounting panel mounting bracket. Can be attached to a DIN rail or directly to a panel surface.
- IP20 (IEC 60529)

Specifications and other descriptions in this brochure are subject to change without notice.
